Equipment / disposal will be additional \$37.00
Per Established Rates

18. One of the primary roles of the land surveyor is to find the boundaries of a property. That boundary is described in legal documents and the land surveyor follows that description and locates the boundary on the physical land and marks it, so the owner knows what land he owns. Having a land survey done can save a lot of hassle and cost in the future, but there are costs to consider when having one done.

Land Survey Plat or Boundary Survey

A land survey plat is completed to exactly locate the boundaries and monuments of a property. Missing monuments (property corners) will be replaced. All above ground improvements and utilities will be documented. Land Survey Plats can be used to locate new improvements properly on a parcel of land.

Topographical Survey

A topographical survey is completed to document the topography of a property. Generally, the topography is documented in two foot increments or contours. These types of surveys may be required by your architect when building on sloped ground. A topographical survey may or may not be part of a full Land Survey Plat.

Elevation Certificate

An elevation certificate is prepared to document the elevation of improvements on a property and is generally required by your insurance company or lender to apply for flood insurance. The land surveyor starts at a location with a known elevation (may be a long distance away) and then translates that to the property using a high precision level device.

Re-Subdivision Plats/Subdivision Plats

Subdivision work includes preparation of the plat documents for approval by owner, mortgagee, governmental, and other entities. The property is fully surveyed and monuments found or set as required by the subdivision process. These may be as simple as adjusting a lot line between two lots to subdividing a larger property into many lots.

Land Survey Rates

The City of Lamar shall impose and collect the following fees for Land Surveying to be charged at the rates as set forth:

Lotstake in a platted subdivision-Single Lot with Land Survey Plat

- Land Survey Plat deposit fee
- Additional lot as part of the same survey
- Lotstake in Unplatted land
- Alta Land Title Survey

LOMA - If Required

NFIP Elevation Certificate

- ILC--Most normally cannot provide, due to work schedule
- Recertification
- Copy of ILC from our records in the office

Subdivision Plat--Hourly fee depending on location and # of lots

- Copy of City map is available on the City of Lamar website
- Hard Copy printed from our computer--24" X 36" size \$6.00
- Hard Copy City map printed from our computer-36" X 60" \$10.00
- Mailed each \$6.50

Electronic Version of Drawings

- .pdf copy of previous survey performed by this office email only \$75.00
- .dwg in autoCad Civil3D format from previous survey--emailed \$250.00
- Same drawing emailed to client who paid for survey N/C

The City of Lamar shall impose and collect fees according to the rates figured by the Land Surveying Department, including wages for time spent on each project. Citizens should call for an estimate.

19. Lamar Community Resource and Senior Center

Senior groups, whose participants are members of the Senior Center may use the facility at no charge during regular hours. Other groups will be charged the following fees for facility use.
